PROFILE

Flutter Mobile Application Developer with hands-on experience building **scalable, production-ready cross-platform applications** using **Clean Architecture**, **Flutter BLoC**, and **RESTful APIs**. Skilled in **real-time and offline-first data solutions**, **Firestore** integration, and **CI/CD pipelines with GitHub Actions**. Passionate about writing **clean, maintainable code** and delivering smooth user experiences across Android and iOS. Seeking a full-time Flutter developer role where I can contribute to production-grade mobile products and grow within a collaborative engineering team.

TECHNICAL SKILLS

Languages: Dart, Python, Java, C
Mobile App Development: Flutter, Cross-platform Development, Responsive UI Design
State Management: Flutter Bloc
Backend & APIs: RESTful API Integration, JSON Parsing, FastAPI, Ktor
Databases: Firestore, Supabase, SQLite (Floor), MySQL
Architecture & Practices: Clean Architecture, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), SOLID Principles, Agile Methodology
Tools & Platforms: Git, GitHub, Android Studio, VS Code
Other: Dependency Injection (GetIt, Injectable), GoRouter (Navigation), Performance Optimization

EXPERIENCE

Flutter App Developer June 2024 – November 2025
eBooster: English Learning App (Coseries) [Play Store](#)

- Built gamification and quiz modules using **Flutter Bloc**, driving higher user engagement and retention.
- Implemented offline vocabulary tracking with **SQLite (Floor)**, including database migration for seamless updates.
- Resolved UI thread bottlenecks and optimized **SharedPreferences** usage, improving stability on low-end devices.
- Applied **Clean Architecture** (data/domain/presentation layers) with **GetIt for dependency injection**, ensuring a maintainable codebase.
- Configured **GoRouter** for declarative nested navigation, improving routing structure and deep-link readiness.
- Redesigned grammar UI/UX with step-by-step progress indicators, enhancing navigation flow and learning outcomes.

Flutter App Developer (Freelance) 2025
NamidVault: Secure Document Vault App

- Built a secure Flutter document management app with PDF upload, metadata tagging, and expiry tracking with push notifications.
- Integrated **Firestore** for secure access control and real-time cloud data synchronization.
- Implemented Emergency Access feature and refactored legacy codebase, improving performance and long-term maintainability.

FEATURED PROJECTS

Blood Setu – Blood Donation Networking App
Real-time Donor & Request Matching Platform for Bangladesh [GitHub](#)

- Developed **Blood Setu**, a Flutter-based blood donation platform with **real-time chat**, **geolocation-based donor matching**, **blood requests**, and **donation tracking** using **Flutter Bloc**, **Clean Architecture**, **GoRouter**, **GetIt**, **Injectable**, and **Firestore**.
- Engineered **geohash-powered donor discovery** with progressive radius expansion and **Firestore cursor-based pagination**, validated against **1,477+ mock records** for scalable performance.
- Configured **CI/CD with GitHub Actions** to automatically analyze, test, and build release APKs on every push.
- Built a **real-time messaging system** using **Cloud Firestore** and **Firestore Realtime Database**, supporting online presence, typing indicators, unread counts, and conversation management.

AI-Powered Smart Farming Assistant (Group Project)

Smart Agriculture & Decision Support System

[GitHub](#)

- Built cross-platform Flutter app with CNN-based crop disease detection and more than 5 **ML models** for yield prediction, fertilizer recommendation, and price forecasting; structured with **Clean Architecture** and **Flutter Bloc**.
- Integrated **Supabase (OAuth and JWT + real-time DB)**, **Dio** for API calls, **Geolocator** for location, and **(GetIt,Injectable)** for DI; added weather API and **AI chatbot** for farmer assistance.

DeenHub App

All-in-one Islamic Mobile Application

[GitHub](#)

- Developed app with 35,000+ Hadith browser, location-based prayer times, kalima, hijri calendar, asmaul husna, ramadan duas, and Tasbih counter using **Flutter Bloc**, **Clean Architecture**, **GetIt**, and **SQLite (Floor)** with offline-first architecture.

Finance Tracker App – Manage Your Money Effortlessly

Personal Finance Management Application

[GitHub](#)

- Built personal finance app with income/expense tracking, savings goals, and daily/monthly/yearly analytics using **Flutter Bloc**, **Clean Architecture**, **GetIt** for DI, **fl_chart** for visual analytics, and **SQLite** for local persistence.

EDUCATION

Green University of Bangladesh	2022 – 2026
<i>B.Sc. in Computer Science and Engineering</i>	<i>CGPA: 3.74/4.00</i>
Adhyapak Abdul Majid College	2019 – 2021
<i>Higher Secondary Certificate</i>	<i>GPA: 4.58/5.00</i>

ACHIEVEMENTS

Vice Chancellor’s Merit Award – Spring 2024 & Fall 2025	<i>Green University of Bangladesh</i>
Recognized for outstanding academic performance; placed on the VC List of Meritorious Students in the B.Sc. CSE program for Spring 2024 and Fall 2025 semesters.	
HackTheAI 2025 – Inter-University Hackathon	<i>Green University of Bangladesh</i>
<i>Powered by SmythOS — Organized by Department of CSE, GUB</i>	
Ranked 14th out of 242 teams ; selected in Top 50 for onsite final round. Built an AI-driven solution under SmythOS mentorship.	

CERTIFICATIONS & ACTIVITIES

Dart & Flutter: Complete Developer’s Guide (Udemy)	July – Nov 2023
Dart & Flutter: Zero to Mastery + Clean Architecture (Zero to Mastery)	Sept – Nov 2023
Technical writer sharing Flutter development tutorials and best practices on personal blog at kawser.me .
